Acuity

Electronic magnifier

Rehan electronics

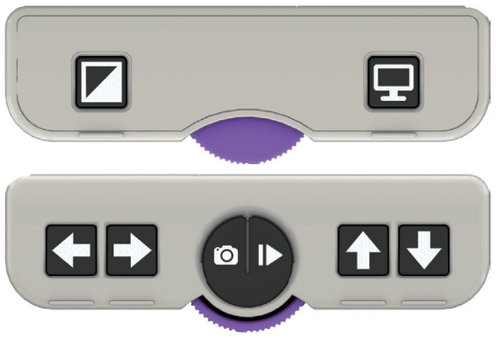
Acuity

A new revolution in electronic magnifiers. We have taken the renowned functionality of the i-See and built upon that with intuitive touch controls to create a user friendly user interface.

With its Full HD camera and self-designed Full HD display, the Acuity delivers a razor sharp image quality in both photo mode as the crisp high contrast modes. With its low minimum magnification of 2× you will have a clear overview of an entire A4 page. If you only want contrast, we even add to that a 1× magnification, to view your documents in actual size.

Suffer from fatigue while reading? With the Acuity Speech you can switch from the Acuity Basic's reading functionality to the added speech functionality with a press of a button. In this mode you will be presented with a vast variety of features and conveniences to let the Acuity Speech read out the text section of your choosing.

The Acuity Basic and Acuity Speech are lightweight (16 and 17kg respectively) and one-box solutions; you only need to connect the power cable and turn the device on.



Main specifications of Acuity Basic

- Full HD camera coupled with a 22" Full HD display
- 1080p60: FullHD resolution, 60Hz refresh rate
- A3 sized XY tableau with horizontal and vertical brake
- Touch controls underneath the screen
- Function masking for user-specific applications
- 2.3× - 65× magnification (A4 width visible, 1× in crop mode)
- 3 photo modes and 10 high contrast modes
- Split screen functionality via HDMI (optional)
- Wireless Bluetooth Remote control (optional)

Added functionality of Acuity Speech

- Reading out of text with easy text navigation
- Language recognition up to 5 languages
- Zone detection (text, paragraph and column detection)
- Full screen Touch controls
- Adjustable volume and reading speed
- Digital document storage
