Looky 5

Handheld electronic magnifier

NEW

Internal memory for up to 20 images

Rehan electronics

Looky 5

The Looky 5 is a magnificent addition to the universally known and revered Looky range. The original Looky was the first handheld magnifier to incorporate a centrally located camera along with a foldable handle for convenient use. The Looky 5 incorporates a bright, vibrant and intuitive touch screen producing superb crystal clear images and exceptional brightness utilising the touch interface on its 5” screen.

With the successful features of the previous Looky models in mind, we have still retained the foldable handle which now has a dual purpose as the handle also contains the battery. The handle is removable which allows the user to use an extra handle when the battery in the first handle depletes. Extra handles, along with an external charging base are sold separately. Internal memory allows the user to save and recall up to 20 images for easy reviewing of reading material.

Rehan Electronics takes great care to manufacture our products in a sustainable and environmentally friendly manner. All products are produced and tested in our eco friendly facility based in Co-Wicklow, Ireland. Our facility is designed to be a low carbon construction with emphasis on natural materials, occupant health and energy efficiency.
